Introducing The Virtual Voice Vault

Phase 1

Freeze Your Voice in Time

Using state-of-the-art equipment in legendary studios, and with a Grammy® winning team, we capture & archive your voice, making it ready for cloning and future text-to-speech projects ~ when you simply have no time to record in person.

At Phase 1 Completion

Voice Verification

We create a set of audio and image files, an official seal to display on your website (like an SSL), plus notarized affidavits to certify your voice belongs to you. We provide you with password protected access to links in the event you are ever the victim of a “deep fake”, you will have dated proof of provenance.

Securely Store Your Voice Clone With Our Vocal Concierge

Your voice belongs solely to you.
It will never be used without your permission.
Your recording will be uploaded to the US Copyright Office
It will be stored with ISO-38500 standards in the virtual vault on US-based servers.

Phase 2 Option

Create Your Voice Clone

Symbol	Original gloss	Approximate IPA equivalent*
-	syllable boundary (always added; original hyphens become -)	/./
˘	syllable boundary after stress*	// or // before syll.
ä	ah, arm, father	/ɑ:/
ä	abet, hat, dilemma	/æ, əɪ/
ä	tame	/eɪ/
ä	fare	/ɛəɪ/
ä	call	/ɔ:/
ë	met, her, second	/ɛ, ɜɪ, əɪ/
ë	mete	/i:/
ë	a in tame	/eɪ/
ī	fine	/aɪ/
ī	him, fir, plentiful	/ɪ, ɜɪ, iɪ, əɪ/

ı	peculiar	/j/

We transcribe your recording script into IPA (*International Phonetic Alphabet*) equivalents, using whichever version best matches your native accent. It is then ready for computer modeling to clone it with whichever level of software or services you choose.

Phase 3

Input/Output Your Project

Next, we discuss and plan for your actual product. Whether a white paper, an audio book or narrated text for clips / commercials, ADR for a movie or podcast, we work with you to determine timeline and budget.
